

Version **3**

Installation Manual

STEP 1: DOWNLOADING

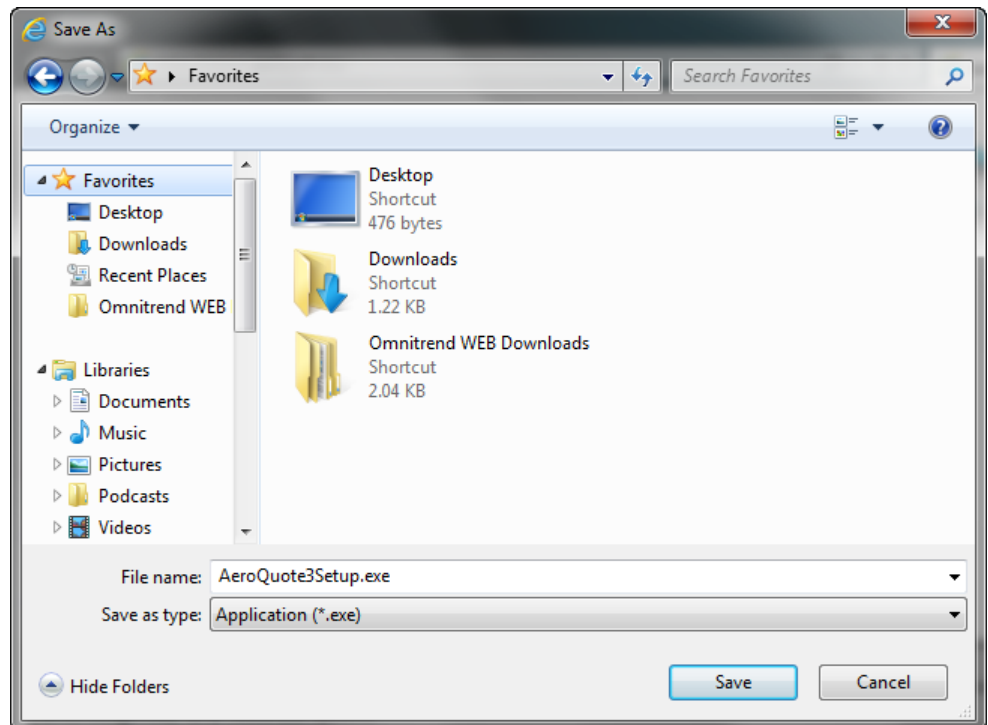

The AeroQuote software is downloadable from the AeroSoft web site.

Start your web browser and navigate to www.aerosoft.biz. On this page, you will see a link to the Full Install for version 3.0. There may be older versions listed, so be sure you are choosing the 3.0 version.

Right click on this link, and select "Save Target As..."

A "Save As" dialog box will appear allowing you to select the location in which you want to save the AeroQuote setup program. It is recommended that you simply choose "Desktop" so that the program icon will be immediately accessible from your desktop.

Once you have chosen the location, choose the Save button. The download will begin, and should take between 10 and 15 minutes depending on your Internet connection speed.

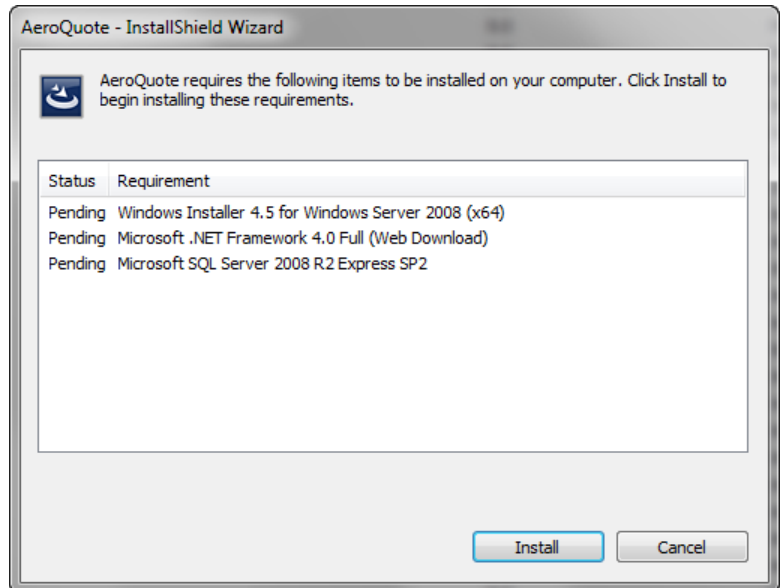

Once the download has completed, an "AeroQuote3Setup" icon will appear on your desktop.

STEP 2: PREREQUISITES

To begin installation of AeroQuote, double-click on the “AeroQuote3Setup” icon on your desktop. This will start the installation program.

Depending on your version of Windows, and how current it is with respect to Windows Updates, there will be up to three prerequisites that require installation prior to the AeroQuote installation. The installation program will automatically detect any prerequisites required. You will need to choose the Install button to begin installation of these items.

One of the prerequisites, Windows Installer 4.5, requires a reboot. Should this prerequisite be required, you will be prompted for a reboot after its installation. Select Yes and, after the computer reboots, the installation will continue.

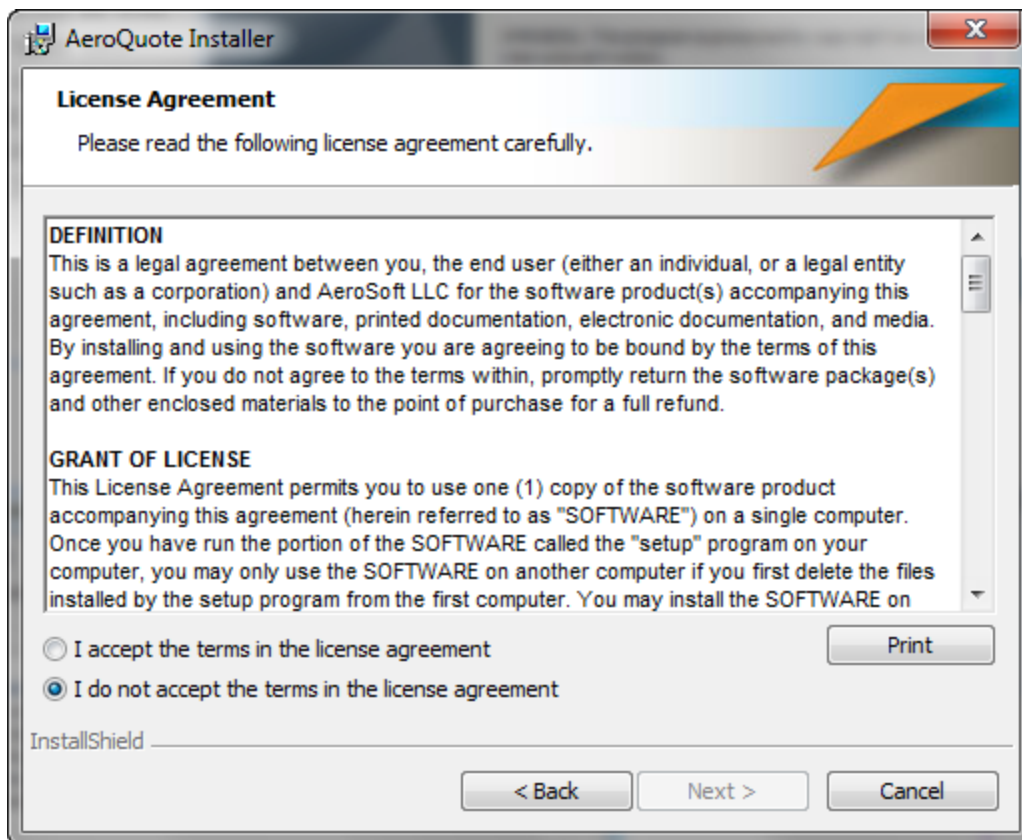

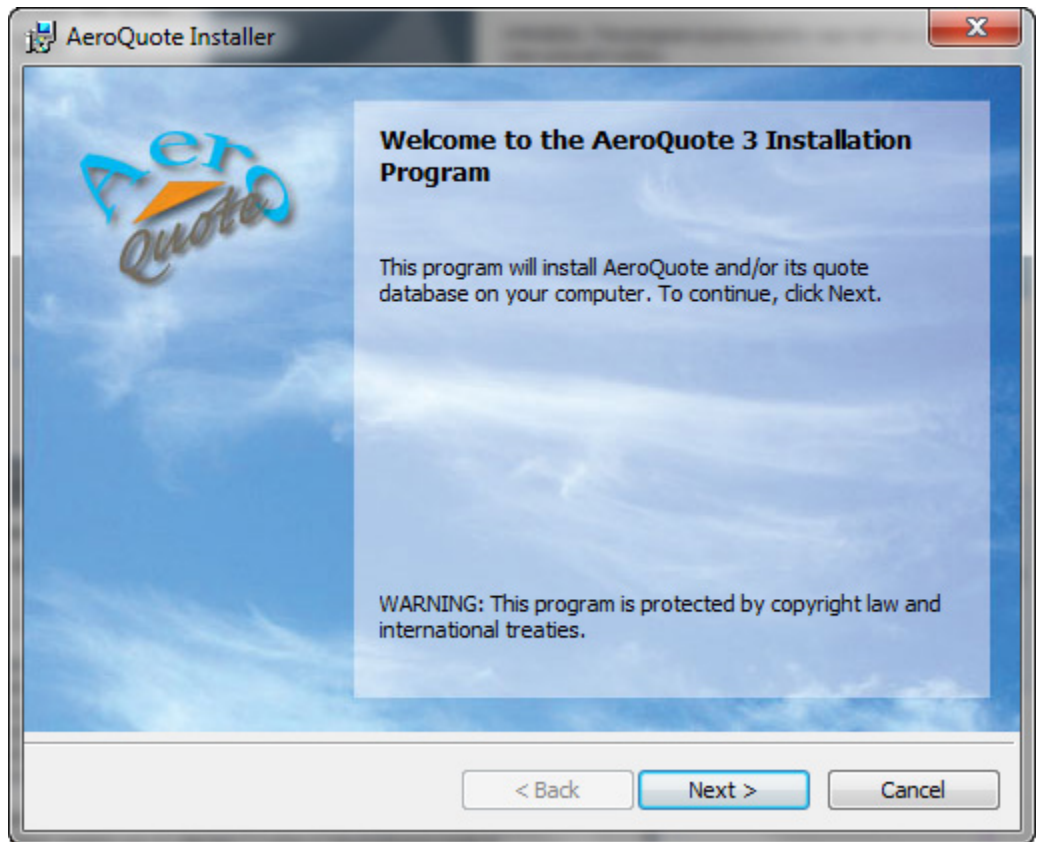

The “Microsoft .NET Framework 4.0 Full” prerequisite will download additional data from the Internet prior to its installation. The download, along with the installation of this prerequisite, will take approximately 5-10 minutes.

Installation of the “Microsoft SQL Server 2008 R2 Express SP2” prerequisite will be required on most systems. This will take between 5-10 minutes depending on the speed of your computer.

Once any prerequisites have been installed, the AeroQuote installation will begin.

STEP 3: INSTALLATION

The AeroQuote installation phase will begin with a welcome screen. Choose the Next button to proceed.

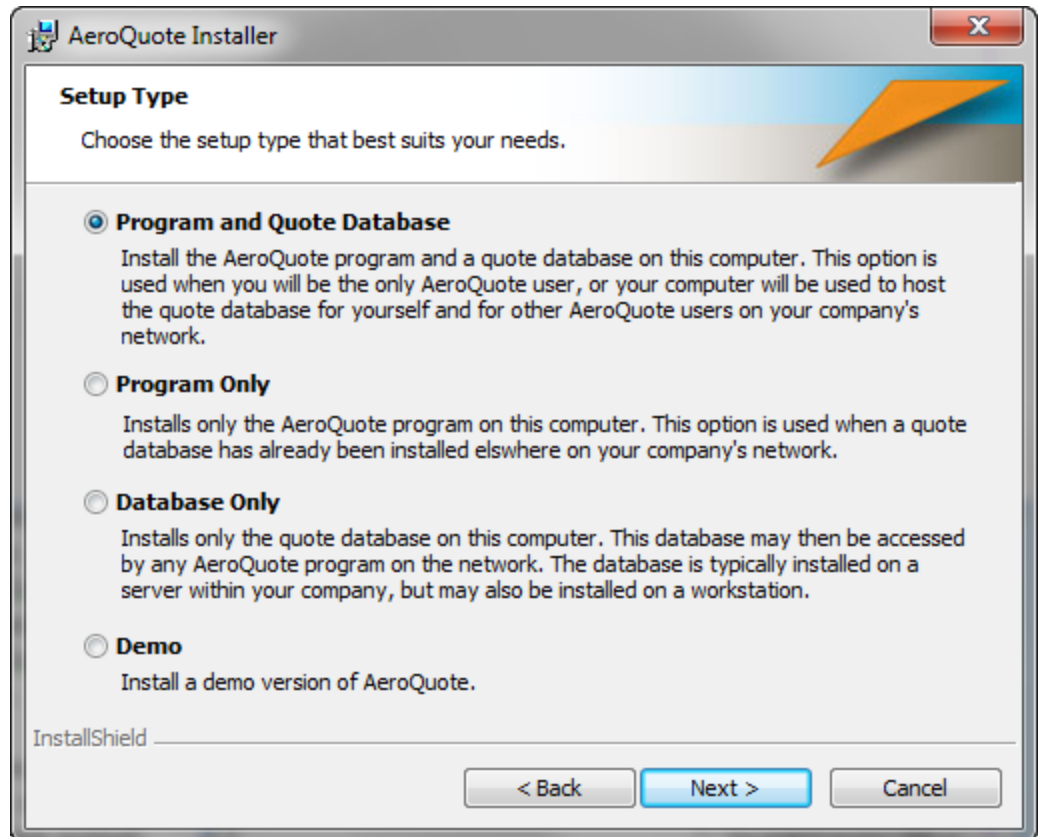

The License Agreement will now appear. When you have read and agree to the terms, choose the Accept button, then choose the Next button to continue.

The Setup Type screen will now appear.

An AeroQuote system is comprised of a quote database and one or more AeroQuote programs. The quote database retains all of the quoting information that may be accessed by each AeroQuote program.

The AeroQuote program is installed on each computer on which it will be needed. The quote database is installed on just one computer, and can be either a workstation or server.

The Setup Type screen allows you to install just the program, just the database, or both. If you will be running AeroQuote on only one computer in your organization, you may install both components on the same computer.

If you are installing a demo version of AeroQuote, select "Demo." This will install both the AeroQuote program and database on your computer.

After you have chosen your desired setup type, choose the Next button to continue.

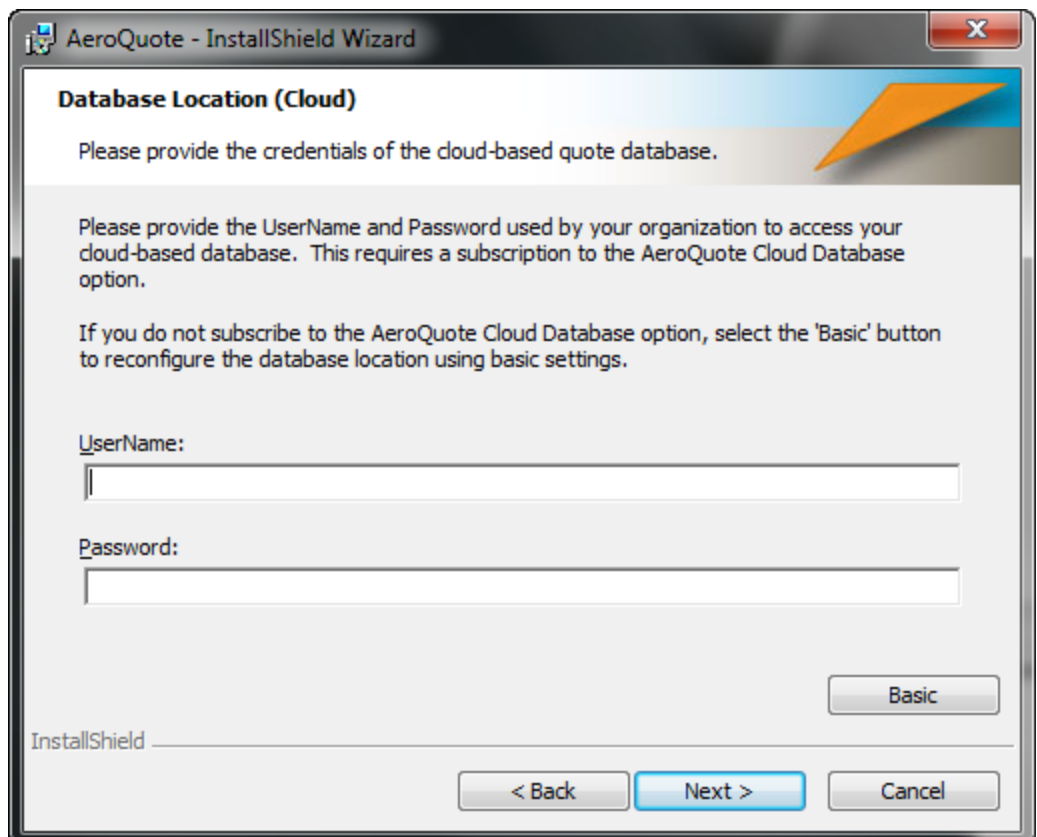

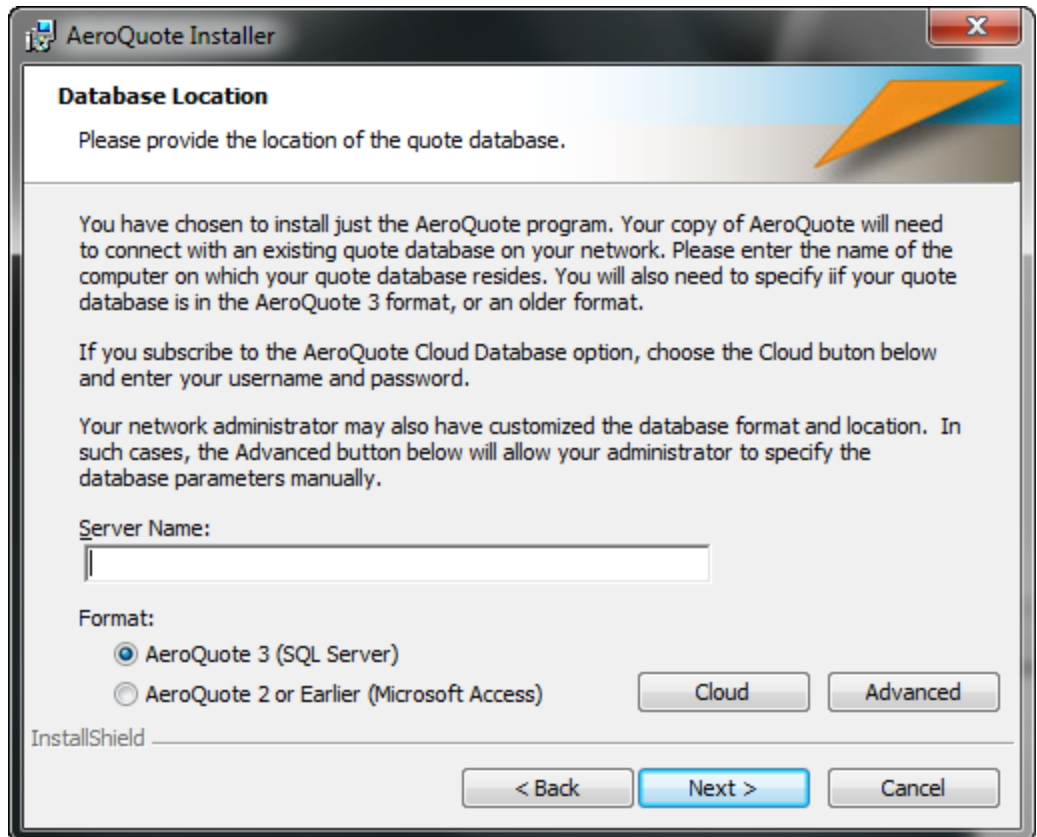

If your chosen setup type was Program Only, you will be presented with the Database Location screen. Here, you need to specify the computer on which the AeroQuote database resides.

If you do not know the computer name, please check with your network administrator, or the individual that installed the AeroQuote database.

You also have the option to change the database format. This format is different between AeroQuote 3 and prior versions. If you are installing the AeroQuote 3 program in an environment that is still running with an older format database, choose the "AeroQuote 2 or Earlier" button.

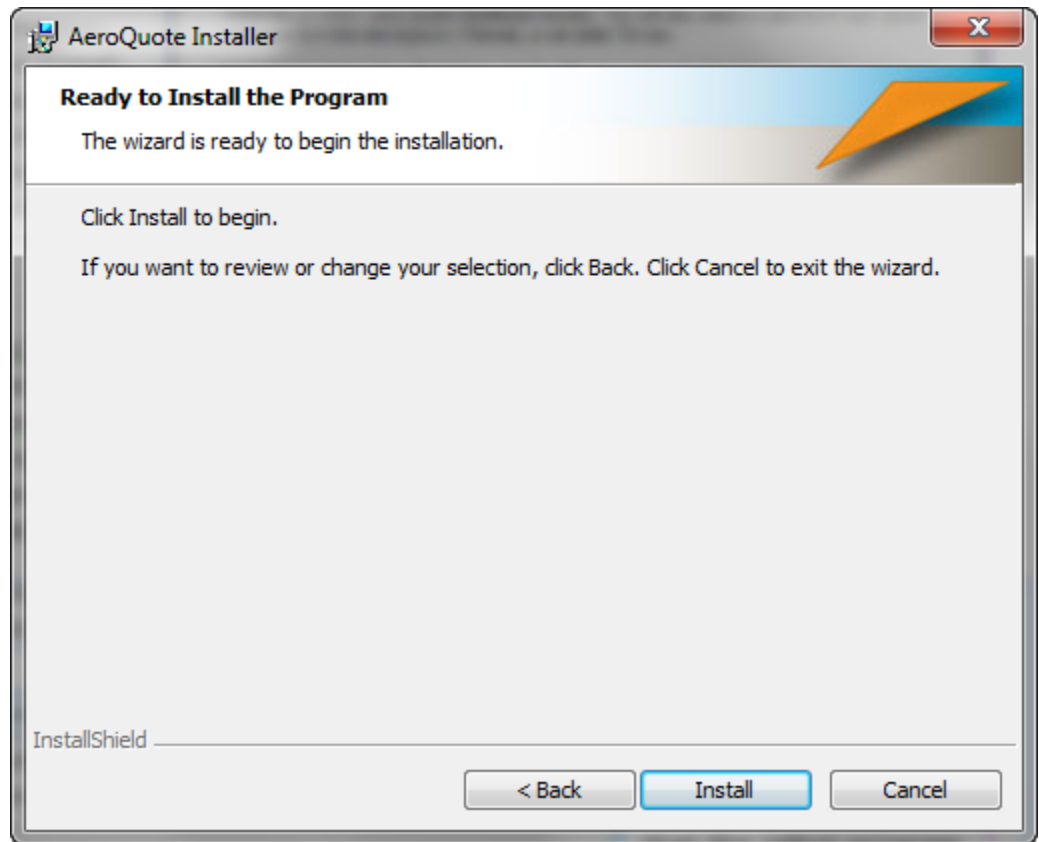

If your organization subscribes to the AeroQuote Cloud Database option, choose the Cloud button and enter your cloud option user name and password.

When finished, choose the Next button.

Lastly, the Ready to Install screen will appear.

Choose the Install button to begin the installation. This should normally take only a minute or two.

After the installation completes, you may delete the "AeroQuote3Setup" icon from your desktop. If you have installed the AeroQuote program, the setup program will create an "AeroQuote" icon. If so, be sure not to delete this icon. Delete only the icon labeled "AeroQuote3Setup".

The first time you run the AeroQuote program on a computer, it will prompt you for your Agency ID. If you do not know your agency ID, please contact AeroSoft for assistance.
